

# 1. Front End Developer / UI - UX Developer (DeFi)

## About Timeswap:

Timeswap Labs is building the first fully decentralized money market protocol on Ethereum. We are solving one of the hardest problems in DeFi of building trustless & permissionless money markets without using any external Oracle.

Timeswap uses a proprietary AMM for price discovery of interest rates & collateralization ratio without using an external Oracle. Timeswap opens up debt financing for long tail assets just like Uniswap opened up equity financing for all long tail assets. Timeswap is backed by founders of a multi billion dollar crypto protocol, top tier VC funds from Silicon Valley & Singapore and by prominent Angel Investors within the Ethereum community.

## Must Have:

- Minimum of 1+ year of work experience developing slick UI using ReactJS / ELM/typescript
- Experience in building complex pixel-perfect layouts using HTML, CSS, and JavaScript Design Patterns
- Experience with GraphQL, web3.js, ethersjs
- Willing to learn

## Good to Have:

- Knowledge of HTTP(s), WebSocket, API integration
- Familiarity with DeFi and the common UI practices within crypto
- Passionate about open source

## How to apply:

1. Share your CV + Github link to [careers@timeswap.io](mailto:careers@timeswap.io)
2. Fill <https://docs.google.com/forms/d/17FVXL2bG-dOIReg3Jly2fPpEmvUcpVcLfqoRWhyIOvQ>

## **2. Technical Product Manager - DeFi (Full Time)**

### **About Timeswap:**

Timeswap Labs is building the first fully decentralized money market protocol within the DeFi ecosystem. We are solving one of the hardest problems in DeFi building trustless & permissionless money markets without using any external Oracle. Timeswap uses a proprietary AMM for price discovery of interest rates & collateralization ratio without using an external Oracle. Timeswap enables debt financing for long-tail assets just like Uniswap enabled equity financing for long-tail assets. Timeswap is backed by founders of a multi-billion-dollar crypto protocol, top-tier VC funds from Silicon Valley & Singapore, and by prominent Angel Investors in the web 3.0 ecosystem.

### **Role:**

Timeswap Labs is hiring for Technical Product Manager, who will be responsible for the product development process as they work collaboratively with the Technical team to scope and plan out projects in alignment with Timeswap. This is a full-time, remote position and can be based anywhere within IST - GST time zones.

### **Responsibilities**

- Carry out our Protocol product development from conception to launch, sprint planning, grooming, and retros.
- Execute against team KPIs and deliverables.
- Be the main point of contact with our partners for alignment on roadmaps, status updates, requirements, priorities, etc. on the product side.
- Proactively resolve or escalate any issues to minimize the impact on client satisfaction, team morale, or service quality.
- Hold regular 1:1s with the tech team to ensure the team is happy, engaged, and works together cohesively.
- Collaborate with the Marketing team to update on the product development process and keep everyone updated for major and minor feature releases.
- Utilize metrics and data, to drive business performance to Timeswap's product.

### **Requirements**

- 2+ Years' experience as a Product Manager, owning a technical product in the DeFi ecosystem.
- Basic structural understanding of smart contract deployment, UI features within DeFi ecosystem.

- Experience using Data Analytics Platforms (Amplitude, Google Analytics, or Mixpanel etc).
- Strong leadership and team management skills and excellent communication and interpersonal skills
- High service mentality and passion for problem-solving to go above and beyond to serve internal and external stakeholders
- Ability to evaluate trade-offs and make effective decisions
- High level of emotional intelligence & empathy

**How to Apply:**

- Share your CV to [careers@timeswap.io](mailto:careers@timeswap.io)
- Fill <https://docs.google.com/forms/d/17FVXL2bG-dOIReg3Jly2fPpEmvUcpVcLfqoRWhyIOvQ>
